JEREMY LIU

Undergrad Student

jel139@ucsd.edu | 909-367-4623

EDUCATION

Bachelor of Math-Computer Science (In-Progress)

- University of California San Diego

Sep 2023 - Oct 2026

SKILLS

- Java
- Python
- Django
- Knowledge of RSA cyrptography
- Pandas
- JavaFX
- C++

Projects

- Collaboratively used Java and JavaFX to write a planner app using MVP structure. Used agile software design, involving sprints and milestones, alongside different design patterns to achieve a final result.
- Used Python and Pandas to help explore the relation between an NBA player's wingspan and advanced metrics, such as LEBRON, EPM, DPM through the use of various regression models. Scraped through various domains to obtain the required data, as well as cleaned the data, to perform these experiments
- Designed a web app to store access to freely available full-length NBA games that are available through YouTube as a database. Designed a login-system to submit games for review. Added a query system to find games by date, player, team, regular/postseason. (WIP)
